

Phase 2 Updated EER | CS 6400 – Spring 2019 | Team 07

We had no Phase 1 feedback and made no significant changes to our Phase 1 EER diagram. However, we did change some of the attribute names in our EER to relational mapping and have updated the EER diagram to reflect those names to make grading easier. Here is a list of those changes:

- All attribute names changed to start with initial lowercase.
- City.Name changed to City.cityName
- Holiday.Name changed to Holiday.holidayName
- Product.Name changed to Product.productName
- Category.Name changed to Category.categoryName
- Manufacturer.Name changed to Manufacturer.manufacturerName
- Manager.Name changed to Manager.managerName

No other changes were made to the updated EER diagram.
